

A large, abstract red graphic on the left side of the page, composed of several overlapping geometric shapes, including a large triangle and a parallelogram, creating a dynamic, angular composition.

AUTOPOL

Hakkımızda

Autopol, Polteks Şirketler Grubu'nun 1994 yılından bu yana sürdürdüğü sanayi ve üretim faaliyetlerinin, genç ve dinamik bir parçası olarak konumlanmaktadır. Polteks'in ayrı bir faaliyet kolu olarak 20 yılı aşkın süredir üretim yapan Autopol, otomotiv sektöründeki gelişmelere paralel olarak büyüme kararı almış ve bu doğrultuda 2008 yılında Kayapa'daki üretim tesislerini başarıyla genişletmiştir.

Autopol, Türkiye, Romanya, Özbekistan ve Rusya tesislerinde, poliüretan ve ndı ürün gruplarında geniş bir ürün yelpazesi sunmaktadır. Müşteri taleplerine özel formülasyonlar geliştirme ve özel kalıplar üretme yeteneği ile öne çıkan firma, ileri teknolojiyle donatılmış poliüretan laboratuvarı sayesinde aşınma, çekme, ömür ve performans gibi tüm testleri kendi bünyesinde gerçekleştirebilmekte, böylece ürün geliştirme ve kalite kontrol süreçlerini hızlı, güvenilir ve yerinde bir şekilde yürütebilmektedir.

Autopol, uzun yıllar aftermarket pazarına yönelik üretim gerçekleştirmiş; artan talep doğrultusunda özel bir üretim hattı kurarak, otomotiv ana sanayi ve OEM parçalar ile doğrudan çalışmaya başlamıştır.

Bugün teknik bilgi birikimi, üretim kapasitesi ve esnek yapısıyla Autopol; müşteri odaklı, çözüm sunan ve sektörel ihtiyaçlara hızlı yanıt verebilen bir üretim firması olarak faaliyetlerini sürdürmektedir.

About Us

Autopol is positioned as the young and dynamic division of Polteks Group of Companies, which has been engaged in industrial and manufacturing activities since 1994. Operating as a separate business of Polteks, Autopol has been manufacturing for over 20 years, and in line with developments in the automotive sector, decided to expand. Accordingly, in 2008, the company successfully enlarged its production facilities in Kayapa.

Autopol offers a wide range of products in the polyurethane and NDI product groups at its facilities in Turkey, Romania, Uzbekistan, and Russia. The company stands out with its ability to develop custom formulations and produce special molds tailored to customer requirements. Thanks to its state-of-the-art polyurethane laboratory, Autopol is able to conduct all essential tests — including wear, tensile strength, durability, and performance — in-house, enabling it to manage product development and quality control processes quickly, reliably, and efficiently.

For many years, Autopol focused on manufacturing for the aftermarket sector. However, in response to increasing demand, it established a dedicated production line and began working directly with the automotive OEM and main industry sectors.

Today, with its technical expertise, production capacity, and flexible structure, Autopol continues to operate as a customer-oriented manufacturing company that provides solutions and responds rapidly to industry needs.
